**INCREASING YOUR YIELD ... It's our business!**

## CUSTOM TWO-EDGED RIPS

American Lumber's Custom Two Edge Ripping program is all about creating solutions that help our customers decrease costs and increase productivity.

Over time we have developed four general Custom Two Edge Rip grades that customers can benefit from.

American Lumber's Custom Two Edge Rip grades include:

- **Clear 1 Face 2 Edge (C1F2E)**
- **Single Defect Rips**
- **70% Clear Cut Rips**
- **50% Clear Cut Rips**

And if these standard grades don't fit we will customize a solution to your exact specifications!

The **American Lumber's Custom Two Edge Ripping** program helps you improve your manufacturing productivity and increase your production yields.

For more information contact us at 814-438-7888 or visit [www.alumber.com](http://www.alumber.com).

**INCREASING YOUR YIELD ... It's our business!**

## PARALLEL EDGE RIPPING PROGRAM

American Lumber's Parallel Edged Ripping program is a more productive alternative to traditional straight line ripped one edge lumber.

This SLR2E offering provides flexibility and choice of edge in the manufacturing process.

With Parallel Edged Lumber you:

- Save Time!
- Gain Choice!
- Improve Yield!

Parallel Edged Lumber is ready to use because it has no bad edges and virtually no side bend!

With Parallel Edged Lumber you improve your manufacturing productivity and increase your production yields.
